3. The service installation address of 1Gbps Business Broadband service must be within HKBNES's service coverage.

Maximum upload/download speed to local site could be up to 1 Gbps. The actual bandwidth that the Customer can enjoy may be affected by Customer's hardware/software, router specification, site traffic loading, type of content being processed and other environmental factors; and hence is normally less than the above speed. The bandwidth to overseas sites will also be subject to the conditions of local network there, and therefore the bandwidth might be even less.
